

VORATUS INC.

Rapid Technical Triage

One Calgary-area on-site technical day to find practical issues before the next spend decision.

CAD \$1,500

FIXED FEE

Calgary-area site visit. Taxes extra.

These packages are entry points, not a menu of limits. If your project needs practical manufacturing, sourcing, supplier, documentation, assembly, serviceability, cost-reduction, or build-readiness support, Voratus will define the right scope and stay focused on the work needed to move it forward. All work remains subject to agreed scope, project suitability, and applicable service exclusions.

ON-SITE TECHNICAL TRIAGE

One on-site working day to identify the obvious, expensive, and decision-critical problems.

Voratus visits your site, talks with the team, reviews the current project material, and identifies practical manufacturing, drawing, CAD, supplier, sourcing, cost, build, and release-readiness issues visible within the day.

INCLUDED TIME

Up to one on-site working day in the Calgary area.

PRIMARY USE

Fast practical advice before supplier release, purchasing, fabrication, prototype changes, or deeper work.

SITE WORK

What happens on site

- Review drawings, CAD, BOMs, photos, prototypes, quotes, and supplier feedback.
- Discuss manufacturing concerns, component choices, sourcing, prices, and constraints with your team.
- Look for practical issues that are likely to cause cost, delay, rework, supplier confusion, or build failure.

REVIEW FOCUS

Where the day is spent

- Manufacturing method and make/buy concerns.
- Drawing, CAD, BOM, material, wall-thickness, tolerance, and specification weaknesses.
- Supplier handoff, sourcing, price, assembly, inspection, service, packaging, and build-readiness concerns.

DELIVERABLES

You receive practical triage output.

- On-site discussion of the main issues found during the visit.
- Concise written triage note summarizing priority risks and recommended next actions.
- Fix now / fix later / specialist needed classification where appropriate.
- Recommendation: CAD \$5,000 review, scoped sprint, or specialist input.

NOT INCLUDED

The offer has clear limits.

- Detailed redesign, CAD editing, drawing production, or tolerance-stack analysis.
- Detailed calculations, FEA, CFD, testing, certification, or compliance sign-off.
- Supplier communication, procurement execution, project management, or implementation work.
- Stamped or regulated professional engineering work.

REVIEW BOUNDARY

On-site advice, not a finished package.

This is a rapid technical triage. It identifies visible risks and recommended next actions from what can be responsibly assessed during one on-site working day. It does not correct the design, create supplier-release documentation, or implement recommendations.

HOW TO PROCEED

Book the site visit and prepare the current project material, main questions, and the decision you are preparing to make.

CONTACT

Send the current package and decision point.

Voratus confirms suitability before fixed-price work begins.

VORATUS INC.

Service Terms

These terms apply to the Voratus Inc. Rapid Technical Triage service unless replaced by a signed written agreement.

Rapid Technical Triage

CAD \$1,500

Calgary-area site visit. Taxes extra.

Scope, exclusions, reliance boundaries, site conditions, and commercial terms for this service.

Scope of service. The Rapid Technical Triage is a narrow fixed-price Calgary-area site visit and technical advice service. Voratus reviews available project materials, speaks with relevant team members, and identifies practical technical and delivery risks visible within the on-site working day. The service is not exhaustive.

Business use only. The service is offered for business, research, product-development, or commercial project use. It is not offered as a consumer household service.

Client authority. The person approving the quotation, submitting payment, booking the visit, authorizing work, or providing materials confirms that they have authority to bind the client and any project owner, sponsor, company, lab, or organization that will use or rely on the service.

Client-provided information. Voratus relies on drawings, CAD, BOMs, photos, prototypes, supplier feedback, prices, constraints, and explanations provided by the client. Voratus does not independently verify accuracy, completeness, ownership, legality, safety, compliance, or suitability unless separately agreed in writing.

Site access and safety. The client is responsible for safe site access, escorts, permissions, required PPE information, site rules, and safe conditions. Voratus may refuse, pause, or leave unsafe, restricted, or unsuitable areas without refund once the visit has started.

Travel area. The fixed fee includes one Calgary-area site visit accepted by Voratus at booking. Travel outside the Calgary area, multi-location visits, overnight travel, parking, special access requirements, or extended site time are quoted separately.

Fixed fee and taxes. The fee is CAD \$1,500, excluding applicable taxes. Taxes are added where required.

Payment and start of work. Work begins after acceptance of these terms, receipt of payment, and booking confirmation. Payment is non-refundable once the visit has started, except at Voratus' discretion.

Delivery timing. Any written triage note is prepared after the site visit and depends on receiving usable project information. Revised, missing, or materially changed inputs may narrow the output or require a separate quote.

Deliverables. The service includes on-site technical discussion, basic practical advice during the visit, and a concise written triage note summarizing priority risks and recommended next actions.

Out-of-scope work. The fee does not include redesign, CAD drafting, drawing production, supplier management, procurement execution, product styling, detailed calculations, FEA, CFD, testing, certification work, legal review, tax advice, safety-certification advice, regulatory approval work, or implementation of recommendations.

Right to refuse or re-scope. Voratus may refuse, pause, or re-scope the work if materials or site conditions indicate regulated work, safety-critical use, hazardous use, restricted products, unlawful activity, incomplete authority, missing information, or scope unsuitable for rapid fixed-price triage.

Cancellation or rescheduling. Site visits may be rescheduled with reasonable notice. Missed appointments, late cancellations, lack of site access, unavailable team members, or unprepared project material may be treated as completed unless Voratus agrees otherwise.

No stamped or regulated engineering. Voratus does not provide stamped engineering, authentication, permitting, code sign-off, professional sign-off, or regulated professional engineering services under this offer. If licensed or specialist work appears required, Voratus may identify the likely handoff point.

No certification or approval. The service does not certify the product, approve it for manufacture or sale, confirm compliance, guarantee supplier acceptance, guarantee cost savings, or replace required testing, inspection, certification, regulatory review, or professional sign-off.

Reliance and intended use. Deliverables are for the client's internal project decision-making and supplier discussion only. No third party may rely on them without Voratus' written agreement. They are not production release, safety approval, compliance approval, or design verification documents.

Client responsibility. The client remains responsible for all design decisions, supplier instructions, release decisions, testing, validation, compliance obligations, commercial decisions, and final use of the product, process, or documentation.

Third-party suppliers. Voratus may comment on suppliers, sourcing, manufacturability, packaging, inspection, maintenance, pricing assumptions, or build risk, but does not control suppliers, manufacturers, certifiers, inspectors, carriers, or their outcomes.

Confidentiality. Voratus will treat client information, project materials, communications, supplier information, and findings as confidential and will not disclose them except as required to perform the service, with permission, or as required by law.

Intellectual property and records. The client retains ownership of its pre-existing designs, files, documents, and project materials. Voratus retains ownership of its pre-existing methods, templates, know-how, review approach, and internal working materials. Voratus may retain reasonable business and legal records.

No duty to update. Voratus has no duty to update any deliverable after delivery for later design changes, supplier changes, new information, test results, regulatory changes, or project decisions unless separately agreed in writing.

Limitation of liability. To the maximum extent permitted by law, Voratus' total liability for any claim arising out of or related to the service is limited to the fee paid for that service. Voratus is not liable for indirect, incidental, consequential, special, lost-profit, production-delay, supplier, launch, certification, regulatory, recall, rework, or commercial losses.

No personal liability. Any claim must be brought only against Voratus Inc. No director, officer, employee, contractor, representative, or advisor of Voratus has personal liability for any claim arising out of or related to the service.

Client indemnity. The client will indemnify Voratus against claims, losses, costs, and expenses arising from client-provided materials, inaccurate or incomplete information, unauthorized third-party reliance, external use of deliverables, intellectual-property disputes, supplier or manufacturing decisions, release decisions, unlawful use, unsafe site conditions, or use beyond the agreed scope.

Claim period. To the maximum extent permitted by law, any claim arising out of or related to the service must be started within one year after delivery of the final deliverable, failing which the claim is barred.

Entire agreement and changes. These terms, together with the accepted quotation, form the agreement for this service and override prior discussions, emails, website text, marketing statements, or informal communications about the same service. Changes must be agreed in writing.

Severability. If any part of these terms is found unenforceable, the remaining terms continue to apply as far as permitted by law.

Governing law and forum. These terms are governed by the laws of Alberta, Canada. Disputes must be brought in the courts of Alberta unless Voratus agrees otherwise in writing.

Acceptance. By approving the quotation, submitting payment, giving written authorization to proceed, booking a site visit, or providing project materials for review, the client accepts these Service Terms.
